

G2B Bi-Angular® Gym

The Body-Solid G2B is the ideal combination of technology and design. Its' most unique feature is the patented Bi-Angular® Press Arm System. Bi-Angular® technology uses a converging axis during the pressing motion to provide 25% more muscle interaction for a faster, more efficient and complete workout. Built on a compact but extremely stable footprint, the G2B packs more exercises into less space than any other gym available. Included in this versatile gym is a Multi-Hip Station to sculpt your hips, thighs and glutes. The fully adjustable back pad is made of DuraFirm™ padding and includes lumbar support for maximum comfort. Our SmoothGlide Bearing System™ allows friction-free movement and long life to the multi-function leg developer. The G2B allows you to perform every exercise you need to sculpt your body to its ultimate form.

Perform over 50 club quality exercises including:
