

POWERED BY ICG®

LifeFitness

IC6 INDOOR CYCLE

The IC6 combines innovative design with high-quality mechanical and electronic components. The WattRate® TFT computer with integrated power supply features performance indication in watts, data exchange with external devices as well as a Coach By Color® intensity guide.

WATTRATE® COLOR TFT CONSOLE

Features a bright, self-powered, fully integrated full color TFT screen and a front LED display. This patented feature displays individual training intensity for the user and the trainer.

SELF-POWERED GENERATOR

Renewable, green-energy. No batteries required. Capturing the riders energy the compact generator at the flywheel recharges the bike's integrated lithium polymer battery.

WATTRATE® POWER METER

Displays a precise measurement of the user's effort in watts. This precision is achieved by using a positioning sensor to measure the resistance applied to the magnetic brake system.

POLY-V BELT DRIVETRAIN

The drivetrain equipped with Poly-V belt can transfer extreme levels of torque smoothly and its 1:10 gear ratio generates an incredibly fast flywheel speed.

MAGNETIC RESISTANCE

The resistance lever gives the user tactile feedback and allows quick adjustment. The actual resistance level is displayed to the user in real-time on the WattRate® computer.

"USER-ASSIST" HANDLEBAR

User assist handlebar post technology reduces the handlebar weight to minimize setup challenges. A system that provides maximum user comfort.

PADDED SPORT SADDLE

The padded unisex sport saddle ensures a comfortable ride.

COACH BY COLOR®

The individual's training zones are displayed by color on the WattRate® Full Color console display to motivate, manage training control and give riders greater understanding of their workout.
