

MX SELECTORIZED DUMBBELL SYSTEM

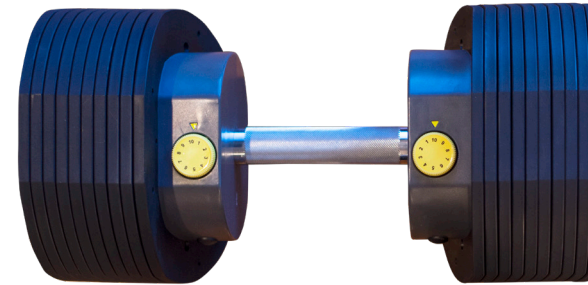

The MX55 Selectorized Dumbbells feature our unique MX SELECT patented rack and pinion system; compact size, balanced and secure.

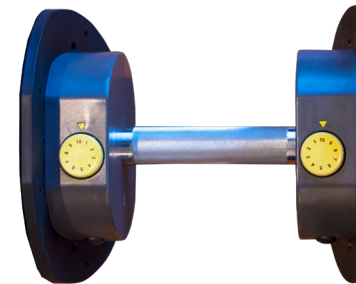

One pair of MX55 Dumbbells replaces a 10-piece dumbbell set and a cumbersome rack. The MX55 Selectorized Dumbbell set on its sleek rack [rack included] is space efficient and easy to use, perfect for any in-home fitness room.

With the MX55 Dumbbell cradled in the weight rack you can simply select the weight from 10-55 lbs [4.5-24.9 kg] at the turn of a dial. The selected weight is locked into place as soon as the selector dial is pushed home. Safe, convenient, accurate and space efficient, the MX55 Selectorized Dumbbell System is a perfect addition to any home workout area.

Includes Pair of Dumbbells, Weight Plates & Rack

MX55 - MAX Weight 55 lb / 24.9 kg

MX55 - MIN Weight 10 lb / 4.5 kg

MX55™
MX SELECT - VARIABLE WEIGHT SYSTEM
